

How to search for apps in iOS

Option 1 – from the search bar

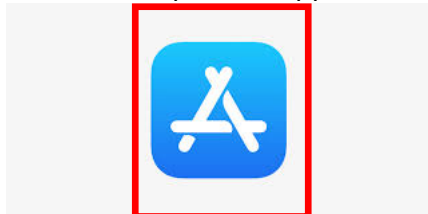

While on your home page, swipe down to reveal the search bar (on older models swipe to the right)

Search for “token”

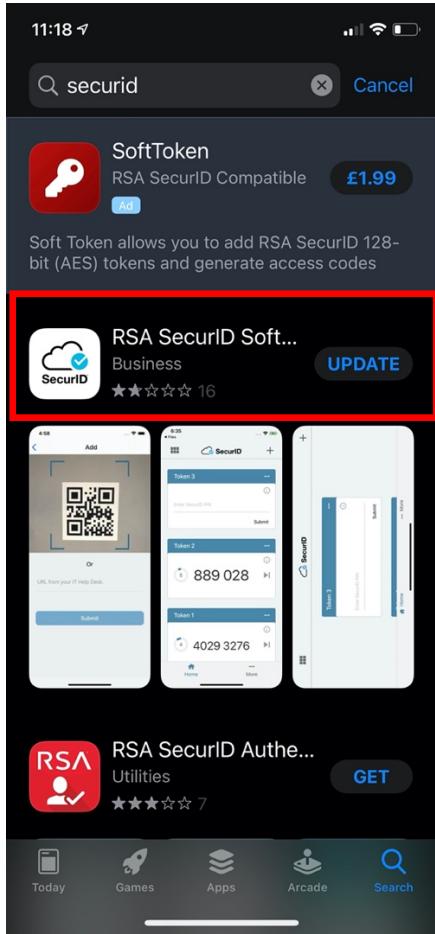

Option 2 – from the app store

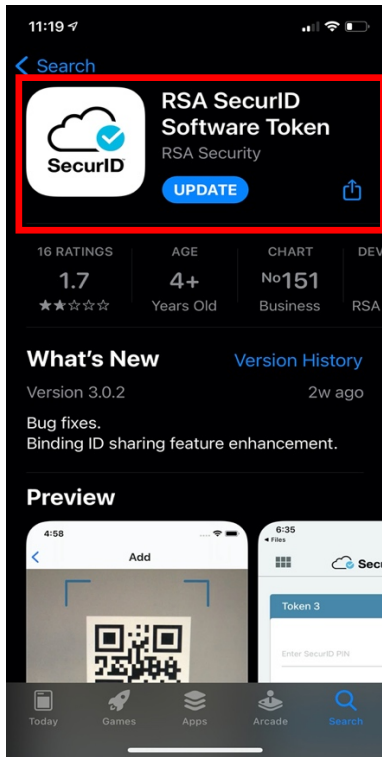

Locate and open the app store on your device

Search for "Securid software token"

Tap to update if required then Open. (if no update is pending the button will say Open)

Enter Pin as usual and Click Submit, it will generate require code to use with dbRAS login
